

AK-40 PBA ASSEMBLY INSTALLATION

1. Using a 9/16 open wrench, screw the tank pressure switch to the outlet of the tank shut off valve, making sure that switch is on top.
2. Install tank shut off valve on the tank.
3. Follow normal installation instructions.
4. Connect feed line from existing plumbing to the inlet of the pump (red tubing).
5. Connect yellow tubing between outlet of the pump and the inlet of the AK-40.
6. Connect the pigtail wire of the pump to the female 2-pin plug of the “Tank pressure switch wire”.
7. Connect the transformer’s 24v cord to the male 2-pin cap of the “Tank pressure switch wire”.
