

TrueSpring
Water Quality Solutions LLC

Your tap water with
TrueSpring water quality.

Swiss engineered, made in Europe

Unique

The principle of **AcquaPhi**

AcquaPhi is an ecological device for water ennobling, enriched with precious metals such as gold, silver, copper, magnetite and semi-precious stones in its interior.

The natural (patented) geometry of the meter-long water course of the corrugated tube around the cone inside, as well as the large-volume oscillating body, which functions on the basis of quantum physical principles, give the water an unprecedented uniqueness for humans, animals, plants and water-bearing systems.

The finest, electrifying vibrations absorbed by the water are transferred to the cell nuclei, which form the cornerstone of life. This results in an increased efficiency of the cells and favours the energy balance. Furthermore, it can lead to benefits such as better drinking quality, more beautiful and purer skin, silky shiny hair, more vitality, more intense taste of food and better plant growth.

Hard drinking water will feel softer because the vibrations generated by the AcquaPhi micronize the sharp lime crystals in the tap water, so the powdery globules no longer adhere to the surfaces.

In addition, the AcquaPhi is 100% maintenance-free, requires no electricity or additives and is CO₂-neutral.

Differentiation

How is AcquaPhi **different**?

The three biggest differences compared to conventional systems are:

1 The corrugated tube and its length.

AcquaPhi uses corrugated pipes that are up to 3.3 metres long. This means that the dwell time of the water is much longer than with other devices. The waves create a permanent swirl in the pipe, which is wound around the PHI cone.

2 Precious metals and semi-precious stones.

AcquaPhi uses an exclusive mix of precious metals and semi-precious stones that are applied to the various components. These create the coordinated, natural and necessary vibrations to imprint the water structure.

3 Large-volume egg shaped oscillating body.

This geometric uniqueness is based on the rule of the PHI formula and intensifies the unsurpassable vibration transmission to the water.

AcquaPhi is 100 % maintenance-free, requires no electricity or additives and is CO²-neutral. All AcquaPhi products have a 10-year guarantee.

Wellbeing

Promotes your **health**

Beautiful fresh and radiant skin

The secret of beautiful skin can be found in AcquaPhi water. It helps you have more beautiful skin that is radiant from the inside out.

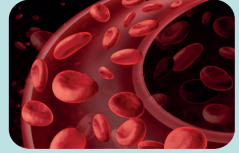

Naturally increased pH value

The enriched water, with glacier water, has a higher pH value than your usual tap water.

Positive energy balance of mind and body

The positive energy balance is reflected in your physical and mental performance at work, during sports and leisure activities.

Higher oxygen levels in the water

In order to process nutrients optimally, our cells need oxygen. Your heart and brain also need enough of it.

Protection

Prevents **calcification** of your pipes and machines

Prevents calcification of the pipes

The best protection is prevention. With the soft AcquaPhi water you save money and never have trouble with stubborn limescale.

Increase the lifetime of your machines

Goodbye to limescale settling onto household appliances, such as washing machines, coffee machines or water boilers, increasing their technical life span.

No limescale on dishes and dishwasher

The water refinement process of the AcquaPhi micronises the sharp lime crystals in the water, so that they no longer stick to your dishes.

Avoid plastic bottles and waste

You already have the most important commodity right at home: water! By naturally refining your tap water, you help save tons of waste.

ACQUAPHI

Advantages

For agriculture and your animals

Increase plant growth by 15 %

University studies show that the carbon dioxide balance (CO²) in plant growth has a greater impact on plants than previously assumed.

Less investment, Higher earnings

Your return is what the field yields each week. With AcquaPhi you can reduce your investment increase your return.

Better quality and higher profitability

The nightmare of every dairy farmer are the somatic cells. The higher the number of somatic cells, the lower the milk yield and quality.

Fountain of youth for your horse

Lactic acid reduces the performance of your horse. You can counteract this through the improved oxygen intake before the competition.

Areas of application

The right thing for every need

AcquaPhi Mini

AcquaPhi Slim

AcquaPhi Micro

Variety

All our **products** at a glance

AcquaPhi Micro

For installation directly on the water tap or in the kitchen base cabinet.

Water tap
3/8"

AcquaPhi One

For installation in combination with water filter systems.

Water tap
3/8" to 1/2"

AcquaPhi Slim

For installation in the kitchen base unit or the skirting board.

Water tap
3/8" to 1/2"

AcquaPhi Mini

For one & two person households, wet room such as bathroom or shower.

Main water line
3/8" to 1/2"

AcquaPhi Family

For apartments & single-family houses with up to 4 persons, beauty centers, medical practices, small production plants as well as animal husbandry.

Main water line
1/2" to 3/4"

AcquaPhi Pro

For single-family & multi-family houses up to 10 persons, fitness and beauty centres, motels and guesthouses, restaurants and bars.

Main water line
3/4" to 1"

AcquaPhi Big

For apartment blocks, multi-family houses from 10 persons, fitness and wellness centres, hotels, small industrial businesses, farms and plantations.

Main water line
1. 1/4" to 1. 1/2"

AcquaGlas o8

Avoid plastic bottles. This bottle holds 800 ml of water and is ideal as a drinking bottle for home and on the go. Dishwasher safe.
